

# The Southern California Intergrated GPS Network

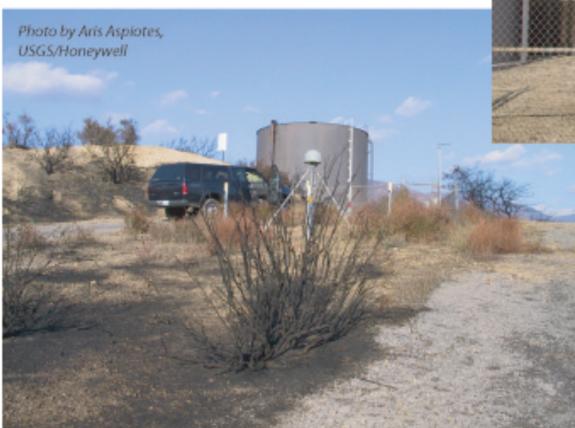

Using the Global Positioning System to Study Earthquakes

SCIGN has over 250 stations in Southern California, in urban, desert, and mountain locations. There are more stations in LA since population, and therefore earthquake hazard, are highest here.

SCIGN suffered no damage in the November 2003 fires ...

but this is how close the fire came to the SCIGN station at Glen Helen Regional Park.

## Skrokkalda, Iceland

The dome developed by SCIGN is used all over the world.

South Pole

**SCIGN thanks the firefighters who saved the station!**
